

Working procedure Slot Allocation closure RTM W21

Discipline: Slot Allocation
Airports: Rotterdam The Hague Airport (RTM)
Seasons: IATA season Northern Winter 2021 (October 31, 2021 – March 26, 2022)
Version: 1.0
Date: April 19, 2021

1. Introduction

- 1.1. Airport Coordination Netherlands (ACNL) has been informed by Rotterdam The Hague Airport that no air traffic is possible due scheduled work in progress during below period (paragraph Runway Closure of the capacity declaration):

The closure of the runway is planned: Monday 29th of November 2021 05.55 UTC (06.55LT) until Sunday 5th of December 2021 22.00 UTC (23.00 LT).

The works are weather permitting, in case of adverse weather conditions or other unforeseen circumstances the works can be rescheduled.

- 1.2. It is allowed to reallocate slots during this period on a non-historical basis. Below text states the process regarding the reallocation of these slots and the impact on historic rights.

2. Process

- 2.1. In order to be eligible for historical slots precedence during the equivalent period in W22, airlines shall submit their slots in the (planned) closure period in the initial coordination.
- 2.2. Airlines are entitled to reallocate slots, which were originally in the SAL during the closure period, after they received the SAL.
- 2.3. In the case of reallocation before the Historics Baseline Date (HBD), the reallocated slots will be considered as new allocations as per normal allocation process. The cancelled slots during the closure period will then not be considered force majeure. The Slot Historic List (SHL) for W22 may include the reallocated series of slots and will not include the original slots from the closure period.
- 2.4. In the case of reallocation after the HBD, the reallocation will be on a non-historical basis. Cancellations will be considered force majeure as a result of airport closure. The SHL for W22 will include the original historical slots from the closure period.

2.5. ACNL may amend above rules if deemed necessary.
